

Capstone Project Title: YesParency: A Web-Based Bidding System

Researcher: Jhervy Miguel B. Cosejo

Mica L. Duhapa

Marvel Achilles E. De Lumban

Compliance Report (Documentation)

Name of Panelist	Comments/Recommendation	Action Taken	Complied		Remarks/Signature
			YES	NO	
1. Mariebeth P. Seño, MIS	Revision on Scope and Limitation. Change number of users into four	The Scope and Limitations were updated by correcting the number of system user classifications from three to four to align with the actual system structure and ensure consistency across the documentation.	✓		 4/3/24
	Add more Discussion of the paper's IPO model	Updated the IPO model discussion to provide a more comprehensive explanation of the system's data flow and technical processes while maintaining clarity and conciseness.	✓		
	Revision on Statistical Treatment. Use the correct Likert Scale	The Likert scale was changed from a five-point scale to a four-point scale to remove the neutral option and encourage clearer responses. The statistical treatment was also updated by adjusting the scale values, descriptions, and mean	✓		

		ranges to match the new scale.			
2. Devie S. Bello, MIT	Revision on Definition of terms. Make all terms not bold.	Remove the bold format and ensure consistent text styling throughout the Definition of terms.	✓		left margin: - 1.5
	Revision on Research Paradigm. Add evaluation in the process section.	Expanded the Process section of the Research Paradigm to include the system evaluation phase based on ISO/IEC 25010 standards.	✓		
	Revision on Research Instrument. Use 4-point Likert Scale with corresponding scale: 4 as acceptable, 3 as Slightly Acceptable, 2 Slightly Unacceptable, and 1 as Unacceptable	The research instrument was changed to a four-point Likert scale: 4 – Acceptable, 3 – Slightly Acceptable, 2 – Slightly Unacceptable, and 1 – Unacceptable. This matches the update in the statistical treatment, which removed the neutral option to get clearer responses from participants.	✓		
	Revision on Research Instrument. Discuss the 4-point Likert scale in paragraph form	The research instrument was revised to use a four-point Likert scale instead of a five-point scale. The scale values and interpretations were updated to 4 – Acceptable, 3 – Slightly Acceptable, 2 – Slightly Unacceptable, and 1 – Unacceptable	✓		- we the ISO 25010 parameters
	Revision on Statistical Treatment. Use the correct Likert Scale as recommended.	The statistical treatment was revised to align with the updated four-point Likert scale. The scale values, descriptive equivalents, and mean interpretation were adjusted	✓		Font size = 12

		accordingly to ensure consistency with the research instrument.	/		mention the WM formula as introductory statement
3. Renato R. Maalis III, DIT	Add RRL of similar system and how your capstone will differ	Incorporated a review of related literature on similar systems and explicitly detailed the unique features that differentiate this capstone project from existing solutions.	/		
	If there are figures that are no legible on portrait, please consider landscape orientation	Adjusted the orientation of specific figures to landscape to ensure maximum legibility and maintain the integrity of the visual data.	/		
	Use 4-scale likert scale only	Standardized instruments to a 4-point Likert scale to ensure consistent data measurement and eliminate neutral response bias.	/
