

Capstone Project Title: YesParency: A Web- Based Bidding System

Researchers: Jhervy Miguel B. Cosejo

Mica Juvenil L. Duhapa

Marvel Achilles E. De Lumban

Compliance Report (System)

Name of Panelist	Comments/Recommendation	Action Taken	Complied		Remarks/ Signature
			YES	NO	
1. Mariebeth P. Seño, MIS	Update the landing page to display upcoming, ongoing, and live bid openings instead of a countdown timer by making it like a carousel.	Redesigned the landing page by replacing the countdown timer with sections for upcoming, ongoing, and current live bidding			
	Improve the display of bidders during the live bid opening.	Enhanced the live bid opening interface to ensure real-time visibility, clearer data presentation, and a more streamlined user experience for monitoring bidders.			
2. Devie S. Bello, MIT					
3. Renato R. Maaliw III, DIT	Implement document verification to ensure the authenticity of submitted bids	Implemented a feature requiring administrative verification of bid document receipts prior to official submission to ensure compliance and validity			

	Remove the edit documents once submitted by the bidder	Restricted document editing permissions once submitted by the bidder to prevent post-submission modifications and ensure data integrity.
